

Migrate + Deploy

Application Migration with Taashee will enable you to experience high performance with maximum efficiency. Meanwhile, Taashee's Application Deployment feature lets you to meet your IT objectives.

Migrating Your On-Premise Systems to The Cloud

Taashee's Application Migration approach is a well-defined one spanning simple elementary processes to complex multi-layered ones. Our migration experts display in-depth subject expertise along with the quintessential technical knowledge.

Application Migration

We migrate your applications from on-premise systems to the cloud irrespective of the technologies and platforms.

Risk Mitigation

Avoid business risks by migrating your applications on time in a secure and cost-effective manner.

Data Portability

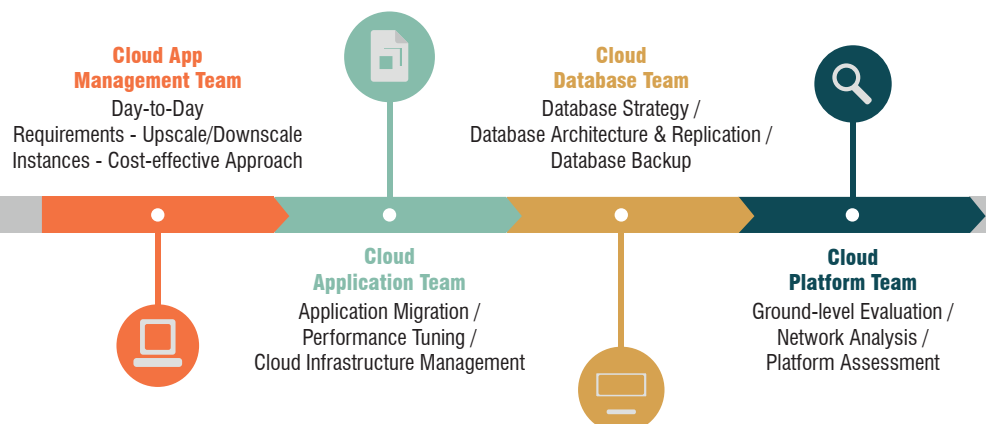

Our migration experts enable data porting at increased rates besides controlling system dependencies without any data loss.

Application Deployment

Our tuning experts will ensure you get best workloads with application frameworks such as Spring, Seam, NodeJS, PHP or Ruby-on-Rails. Also, our in-house Middleware experts will ensure that your web/application servers (Tomcat, JBoss, Websphere or others) are optimized to the core run on cloud.

Application Migration from on premise to cloud is a critical decision for enterprises looking for optimized performance, least maintenance, and enhanced reliability. We have dedicated professionals who ensure that you obtain all such benefits whenever you migrate.
