With an enormous scope to boost business performance, increasing number of organizations are looking for WorkMail service. As a result, the features of compatibility, integration, and flexibility are experienced guaranteeing utmost security.

Features of WorkMail

Highly Compatible

Taashee guarantees utmost compatibility with WorkMail service for enterprise users enabling them to enhance their business prospects tremendously. For instance, the availability of native support for Microsoft Outlook users on Windows/Mac OS never require additional plug-in installation. Additional benefits include:

- ✓ Free/Busy Scheduling
- ✓ Email Delegation Access
- ✓ Free Resource Creation/Utilization
- ✓ Custom "Out of Office" Auto Email Reply

Most Secure

At Taashee, we assure you of utmost security as far as data management is considered. The use of AWS Key Management Service is the primary reason behind that is followed for encryption of data. The feature of data locality is managed as per the AWS region besides encryption standards, which are managed using industry-standard SSL. The advantages are:

- ✓ Automatic encryption of data
- ✓ Total control upon data locality
- ✓ Enterprise-grade security while data transfer
- ✓ Data storage features irrespective of the AWS region

Active Integration

Taashee implements advanced WorkMail features for business excellence with ease. For instance, it is possible to integrate your Microsoft Active directory with Amazon WorkMail benefiting you with flexible user management. Experience the custom setup feature that enables you to realize on-premise configuration as per your requirements benefiting you with:

- ✓ Integration of Microsoft Active Directory (AD) with Amazon WorkMail
- ✓ Access to AWS Directory Services avoiding multiple user management
- ✓ Creation of custom AD to add more users to the network
- ✓ Secure integration with other AWS apps proactively

Advanced Protection

WorkMail features with respect to email security are perfectly implemented by Taashee. More specifically, those users who prefer advanced email services with highest levels of protection get to experience maximum benefits. Sending emails with large attachments in the quickest time possible is one of the major benefits besides others such as:

- ✓ Spam & Malware protection for incoming and outgoing emails
- ✓ Migrate your mailboxes from on-premise email servers to WorkMail
- ✓ Connect from Microsoft Outlook to WorkMail without needing reconfiguration
- ✓ Avoid mailbox restrictions with a minimum of 50GB mailbox available by default
